of their lives hence self evaluation is the key to subjective well being as it represents a person's evaluation of his/her life based on the cognitive and emotional reactions

according to management and psychology courses as well as legions of consultants in organizational psychology shared vision in dyads teams and organizations can fill us with hope and inspire new possibilities or delude us into following false prophets however few research studies have empirically examined the impact of shared vision on key organizational outcomes such as leadership effectiveness employee engagement organizational citizenship coaching and organizational change as a result the field of organizational psychology has not yet established a causal pattern of whether if and how shared vision helps dyads teams and organizations function more effectively the lack of empirical work around shared vision is surprising given its long standing history in the literature bennis and nanus 1982 showed that distinctive leaders managed attention through vision the practitioner literature has long proclaimed that vision is a key to change while conger and kanungo 1998 discussed its link to charismatic leadership around the same time positive psychology appeared in the forms of appreciative inquiry Cooperrider Sorensen Whitney Yaeger 2000 and positive organizational scholarship Cameron Dutton Quinn 2003 in this context a shared vision or dream became a legitimate antecedent to sustainable change but again empirical measurement has been elusive more recently shared vision has been the focus of a number of dissertations and quantitative studies building on intentional change theory Ict Boyatzis 2008 at dyad team and organization levels of social systems these studies are beginning to lay the foundations for a systematic body of empirical knowledge about the role of shared vision in an organizational context for example we now know that shared vision can activate neural networks that arouse endocrine systems and allow a person to consider the possibilities of a better future Jack Boyatzis Leckie Passarelli Khawaja

2013 additionally boyatzis akrivou 2006 have discussed the role of a shared vision as the result of a well developed set of factors that produce a desired image of the future outside of the organizational context positive visioning has been known to help guide future behavior in sports psychology loehr schwartz 2003 medical treatment roffe schmidt ernst 2005 musical performance meister krings foltys boroojerdi muller topfer thron 2004 and academic performance curry snyder cook ruby rehm 1997 this research topic for frontiers in psychology is a collection of 14 original papers examining the role of vision and shared vision on a wide variety of desired dependent variables from leadership effectiveness and executive performance to organizational engagement citizenship and corporate social responsibility and how to develop it through coaching

this digital collection curated by harvard business review offers four books on the topic of emotional intelligence found by bestselling author daniel goleman to be twice as important as other competencies in determining outstanding leadership in primal leadership with a new preface by the authors the authors show that great leaders excel not just through skill and smarts but by connecting with others using emotional intelligence competencies like empathy and self awareness the best leaders are resonant leaders individuals who manage their own and others emotions in ways that drive success in resonant leadership richard boyatzis and annie mckee provide an indispensable guide to overcoming the vicious cycle of stress sacrifice and dissonance that afflicts many leaders and offer a field tested framework for creating the resonance that fuels great leadership and in becoming a resonant leader annie mckee richard boyatzis and frances johnston share vivid real life stories illuminating how people can develop emotional intelligence build resonance and renew themselves finally hbr s 10 must read on emotional intelligence presents 10 articles by experts in the field of emotional intelligence all of which will inspire you to monitor and channel your moods and emotions make smart empathetic people decisions manage conflict and regulate emotions within your team react to tough situations with resilience better understand your strengths weaknesses needs values and goals and develop emotional agility

the blockbuster best seller primal leadership introduced us to resonant leaders individuals who manage their own and others emotions in ways that drive success leaders everywhere recognized the validity of resonant leadership but struggled with how to achieve and sustain resonance amid the relentless demands of work and life now richard boyatzis and annie mckee provide an indispensable guide to overcoming the vicious cycle of stress sacrifice and

dissonance that afflicts many leaders drawing from extensive multidisciplinary research and real life stories resonant leadership offers a field tested framework for creating the resonance that fuels great leadership rather than constantly sacrificing themselves to workplace demands leaders can manage the cycle using specific techniques to combat stress avoid burnout and renew themselves physically mentally and emotionally the book reveals that the path to resonance is through mindfulness hope and compassion and shows how intentionally employing these qualities creates effective and enduring leadership great leaders are resonant leaders resonant leadership offers the inspiration and tools to spark and sustain resonance in ourselves and in those we lead

the science of change integrates over 50 years of research in many fields into a unifying theory of behavioral change intentional change theory ict this multi level fractal theory is equally applicable to getting better at playing the guitar achieving a department sales target rallying a community to action over a toxic spill or mobilizing a country to fight a pandemic in this book richard e boyatzis examines each phase and principle of the theory and provides examples of sustained desired change at the individual dyadic team organizational community and country level

few research studies have tested hypotheses from an integrated multilevel theoretical model on coaching intentional change drawing on intentional change theory ict and supporting cognitive emotion and social complexity perspectives on positive and negative affect this dissertation presents the first empirical investigation on the differential impact of inducing positive emotion vs negative emotion in real time executive coaching sessions nineteen coaching recipients were randomly assigned to two coaching conditions in the pea condition the coachees own hopes strengths desired future the positive emotional attractor was the anchoring framework of a

one-time hour long coaching session in the NEA condition the coaches own perceived improvement needs weaknesses present reality the negative emotional attractor was the anchoring framework two central ICT propositions were tested hypothesis 1 predicted that PEa participants would show higher levels of positive emotion during appraisal of 360 degree feedback results and discussion of change goals than NEa participants hypothesis 2 predicted that PEa participants would show lower levels of stress immediately after the coaching session than NEa participants regression analyses found that the PEa group showed significantly lower levels of negative emotions $p = .05$ and anger $p = .02$ and focused more on personal interests and passions $p = .01$ as compared to the NEa group these findings lend preliminary support to the proposition that framing a coaching session around a coaches PEa elicits positive emotions that broaden a persons momentary thought action repertoire whereas framing a session in the NEa elicits negative emotions that narrow this array further demonstrated time series changes in expressed sadness or depression 01 and future 04 offer preliminary support to the ICT proposition that recurrent PEa NEa arousal and associated interplay of positive and negative emotion characterize intentional change the prediction on post coaching level of stress was not supported

executive wisdom emerges from a complex matrix of factors that affect an individual leader's thoughts, behavior, and emotions, including his or her organization, biopsychosocial systems, behavioral interfaces, internalized human wisdom system, and external and internal challenges. Integrating large data, this book talks about executive wisdom.

In the short time since the publication of the handbook of positive psychology, research results on the psychology of human strengths have proliferated. However, no major volume has documented the methods and theory used to achieve these results. Oxford Handbook of Methods in Positive Psychology fills this need, providing a broad overview of diverse contemporary methods in positive psychology, with contributions from both leading scholars and promising young investigators. The handbook serves to illuminate and at times challenge traditional approaches, incorporating multiple levels of analysis from biology to culture. The contributors present state-of-the-art techniques, including those for estimating variability and change at the level of the individual, identifying reliability of measurements within and across individuals, and separating individual differences in growth from aspects of phenomena that exhibit shorter-term variability over time. The volume covers such topics as wisdom, health, hope, resilience, religion, relationships, emotions, well-being, character, strengths, and laughter. It enhances our understanding of the balance between human deficits and strengths and demonstrates their connections to other problems. Oxford Handbook of Methods in Positive Psychology will be the essential reference for methods in positive psychology.
